WORDS OF WISDOM

Attitude counts--Life can be rough . . . or it can be great. It all depends on whether we approach it with the right attitude. Attitude is generally more important than experience. If a person has the right attitude, you can bet on the fact that he will continue to learn, grow, and develop. Furthermore, he'll always be the kind of person we enjoy associating and working with. If a person doesn't have the right attitude, ability and experience count for little. How do you stack up?
